

Test Team Guide Document

Schedule Scraper Test Team: Daniel, Chris, Jose

Before going through the individual test cases, we would like you to attempt to use the website on your own. There are three primary tasks that we would like you to complete and share feedback with us about your experience with regard to ease of use and any issues that occurred. Feel free to add any images. If you find a very obvious error, this can be reported through our GitHub at <https://github.com/hcrosse/cpsc-internship-site/issues>.

Registering

Thoughts: Difficult to see the gray box lettering

Issues: @mail.umw.edu didn't want to register but @umw.edu did

Logging In / Out

Thoughts: Logged in

Issues: Can log in without anything even though there is a message that says the email is badly formatted

Submitting a Review:

Thoughts: Should have an “other” option because there are more CS skills to learn than just those listed. I would recommend to have salary/wage as an option as having that available is helpful for everyone to know what they are worth.

Issues: Submit button didn't work or indicate anything

Now, please check the document section featuring our actual test cases. You can copy / paste the whole table here or format in another way of your preference.

Test Number	Purpose	Test Case Data	Expected Results	Status	Passed
A-01	Test that website loads	N/A	Website loads	R	Yes
A-02	Test that the review list loads	N/A	A list of reviews should appear on the left side of the website	R	Yes
